Software Engineer InApp Technologies

Project: EASE

Role: Full Stack Developer

Technologies: PHP, LARAVEL, ANGULARJS, ANGULAR 12, Jira, Git

Project Description: EASE (Easy Application for Software Enterprise) is an ERP (Enterprise Resource Planning) system being developed by InApp Information Technologies (India) Pvt Ltd. The aim of this project is to Improve InApp's service delivery, Radically improve the efficiency of operations and our ability to manage them, Reduce/eliminate paperwork and redundant manual processes, Provide better data for decision-makers and stakeholders at all levels, and improve the project management processes and efficiency. The project's long-term vision is to develop EASE into an ideal solution for complete office automation.

Project: Net Direct Auto Sales [Sage Consulting]

Role: Backend Developer

Technologies: WordPress, PHP, Git

Project Description: UK Based project with a huge online inventory of lifted trucks, jeeps, and SUVs provided by an independently owned dealership of

specialized lifted vehicles for their users to select. Our engagement was two-fold, one is to enhance this online system with additional features and fine-tune the infrastructure to provide a better online experience for their customers. The second is to package this solution for resale and licensing to other independent dealerships.

Project: CanZell Realty

Role: Backend Developer

Technologies: PHP, Laravel, AWS, Salesforce

Project Description: US-based company focusing on real estate and we rebuilt their website. The goal is to move the Lead Management tool to the new architecture. Currently, the Lead Management tool is developed using a Custom framework in PHP. This is not allowing them to move it to the new architecture which uses Microservices. Most of the data they use in the Lead Management system are stored in Salesforce. There are also many activities (like triggers, jobs) that happen in Salesforce which manipulates the data. Along with this, they are also expecting an improvement to the current UI. They would like to improve the user experience (simple style, Clean) so that any user (young or old) can use it easily.

31/12/2016 – 13/12/2018

PHP developer trainee Milchkine Technologies

Domain: E-Ticketing
